Attachment to Notice of Non-Compliant Appeal Brief

An appeal conference was held on January 4, 2006 to evaluate the merits of the appeal brief. The conference was held with Primary Examiner Sam Rimell, SPE Charles Rones and SPE John Cottingham. It was determined that the appeal brief was not in compliance with the requirements of 37 CFR 41.37 (c)(1)(v). In particular, the brief does not correlate each of the means plus function recitations in claim 16 to the specification and drawings, and no correlation is provided for claim 15.

The following suggestion was offered by the panel: Start with claim 16 and correlate the preamble and each of the means plus function recitations to the specification and drawings. Since claim 15 is analogous to claim 16, use the similar correlations for claim 15.
